HARD WORK.**

SAFETY FOOTWEAR

The JCB footwear range offers a robust selection of safety boots, trainers, and wellingtons. Combining safety, durability, and design to create a collection of high-quality styles for you to choose from.

With in-built comfort, JCB footwear is designed to withstand use in all trades.

ICONS

EN 20345:2011

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection + Antistatic + Energy absorbing heel

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection + Antistatic + Energy absorbing heel + Pierce resistant midsole to 1100 newtons

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection + Antistatic + Energy absorbing heel + Water resistant upper

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection + Antistatic + Energy absorbing heel + Water resistant upper + Pierce resistant midsole to 1100 newtons

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection + 100% Waterproof

SAFETY BASIC - EN ISO20345:2011 + 200 joules toe protection + 100% Waterproof + Pierce resistant midsole to 1100 newtons

WATERPROOF MEMBRANE - Waterproof and breathable lining

ANTISTATIC - Reducing, removing or preventing the buildup of static electricity

DUAL DENSITY - Allows for longer wear time with less fatigue, as well as increased shock absorbency and energy return

STEEL MIDSOLE - Resistant to 1100 newtons

NON-METAL COMPOSITE MIDSOLE - Resistant to 1100 newtons. Ideal for metal free environments. Lightweight.

BASIC LEVEL SLIP RESISTANCE - Tested to the basic level of slip resistance to standard EN ISO 13287:2011 - On a ceramic surface with 'soap'

HIGHEST LEVEL SLIP RESISTANCE - Tested to the highest level of slip resistance to standard EN ISO 13287:2011 - On a ceramic surface with 'soap' + On a steel surface with glycerol

HEAT RESISTANT OUTSOLE - Heat resistant to 300°C for a maximum of 60 seconds

ALUMINIUM TOECAP - Providing 200 joules toe protection. Lightweight.

NEW ICONS FOR 2022

EN 20345: 2022

SAFETY BASIC - EN ISO20345:2022 + 200 joules toe protection + Antistatic + Energy absorbing heel + Water resistant upper + Waterproof lining + Perforation resistance

Slip resistance of the safety shoes on ceramic tiles with glycerine. When the heel slides forward, a coefficient of friction of ≥ 0.19 mm is allowed. When the front part of the shoe slides backwards, a coefficient of friction of ≥ 0.22 mm is allowed.

In order to determine abrasion on the overcap, a Martindale abrasion test of 8,000 cycles will be carried out. According to the test, the overcap must not develop any holes across its entire thickness.

Resistance to oil and petrol

Energy absorption of seat region

Perforation resistance: non-metal insert: 3mm nail

Perforation resistance: non-metal insert: 4.5mm nail

Perforation resistance: metal insert

Cold insulation
